## Education

**Vignan's Institute of Information Technology**  
**Mechanical Engineering (CGPA - 6.42)**

**Visakhapatnam, AP**  
**Graduation date: November 2021**

## Projects

### Hackathon: Order Management App

Developed an Application for Web and mobile users which assists businesses in keeping track of their stock levels and new orders based on the time range they specify. Their expenses for increased inventory and inventory upkeep are reduced as a result. Businesses will be informed

of the optimal seasons to expand inventory and adjust it accordingly. This app was developed using Zoho App Creator.

### **Personal Project: Creating a Local Server**

I set up a local server file transfer network between my personal desktop and wireless devices that allows users to move data files between devices within the same network. This can only be done if both devices have the required third-party application installed and possess the necessary passcodes to access the network.

### **Academic Project: Electric Car (Conversion)**

The goal of this project is to convert old, unused fuel-powered cars into electric vehicles with minimal modifications and at a low cost. This will not only provide an affordable option for end users, but also help to reduce the waste produced by abandoned vehicles.

## **Extracurriculars**

- Served as an organizer for a two-day intercollegiate festival.
- Participated in and organized activities, events at intercollegiate fests.
- Volunteered in the CEAT India road safety campaign to raise awareness about road safety among youngsters.
- Actively participated in a number of hackathons, where I have had the opportunity to develop a wide range of applications. Through my participation, I have honed my ability to work under tight deadlines and deliver high-quality results.
